LIONS GATE HOSPITAL

Vancouver Coastal Health is building the new Paul Myers Tower on the Lions Gate Hospital campus. The new tower will be a state-of-the-art, high-tech facility that will serve as the hub for acute care services for Coastal Communities. The new acute-care facility will replace aging infrastructure and incorporate innovations that will enable us to deliver the highest quality of care possible.

Architectural Designer

AVRP Skypoint

Oct 2019 - Sep 2021

Vancouver, CA

THE WEDGE

VANCOUVER, CANADA

The Wedge located in Victoria a building mixed-used, The tower's shape and architectural elements are meant to reflect the design of the chapel while its massing reclaims lost density at the base through greater density on the upper floors.

Along the side its unique architectural presence, the building's roof is likely to include a solar panel installation as an eco-friendly element. The tower's solar installation would be a first at its scale for modern building in the region and one of the first such installation on Vancouver Island.

Architectural Designer

Architect**Vitaller**Jul 2018 - Aug 2019
Barcelona, ES

**OBERIG
KIEV, UCRAINE**

The project is located on the banks of the Dnieper river, the oldest part of the city, surrounded by two green areas with an ecological and landscape interests, the Puixkin Park and the Kiev zoological park. The building is the transition between the urban area and the large urban park, through a large courtyard that overlies the real area, integrating the Clinic and the park. The project is the construction of a new hospital that will provide a unique specialized service and will work with the existing clinic to provide a complete complex of services.

The two buildings will have their own special services and will cooperate for a single complete clinical offer. All two are to complement the seva offer of services, avoiding duplication of areas where possible.

Architect

Vitaller

Jul 2018 - Aug 2019
Barcelona, ES

**ENERGY SERVICE & CMA
BARCELONA, SPAIN**

The object of the project is the construction of a new Health Center in Granollers and at the same time taking advantage of the provision of public architecture to create a city on a plot that acts as a boundary between two well-differentiated urban areas. The proposal is developed vertically, at each level there is a different service, this achieving a clear and easily understandable organization by users.

Architect

Freelance

Jul 2018 - Aug 2019

Barcelona, ES

CASA XINA BARCELONA, SPAIN
